**From:** Mark J. Dowiak *M. Dowiak*  
**Date:** 15 July 1997  
**Subject:** Enviro-Chem Superfund Site  
Monthly Progress Report Number 47  
June 15 through July 14, 1997

**MEMORANDUM**

This Monthly Progress has been prepared in accordance with Section XII of the Consent Decree entered September 10, 1991, Number 83-419C, U.S.D.C. District of Indiana.

**Activities**

*de maximis, inc.* conducted the June monthly site inspection at the Enviro-Chem Superfund site on June 20, 1997. The following conditions were noted during the monthly site inspection:

- ▶ The distances from the lowest strand of barbed wire to the channel bottom in the north drainage ditch and the Parcel 45 south diversion channel were 27 inches and 22.5 inches, respectively. These are the same distances that were measured during the May inspection.
- ▶ The decon pad and the water storage pad contain water. This does not appear to be causing any effect on the site.
- ▶ The asphalt material that has been placed against the outside of the fence directly across from the Boone County Resource Recovery Systems (BCRRS) office which resulted in a two (2) to three (3) foot elevation increase continues to be monitored each month. There does not appear to be any significant effect on the fence as of this inspection.
- ▶ The areas where the sheens were observed in March were inspected. There were no visible signs of sheens observed during this inspection.
- ▶ The weeds in the ditches in the southern portion of the site were cut.

The Requests for Bids for construction of the remedial action were issued on June 16, 1997.

15 July 1997  
Page 2

**Activities to be Conducted from July 15 through August 14, 1997**

- ▶ *de maximis, inc.* will conduct the July monthly site inspection.
- ▶ The Trustees will receive and review the bids for construction of the Revised Remedial Action Plan.
